## Company overview

A platform built by engineers, for engineers, Datadog enables teams to work more efficiently and collaboratively by enabling digital transformation, cloud migration, and infrastructure monitoring of our customers' entire technology stacks.

Our internship program

We offer **Software Engineering** internships in Madrid, starting in **February 2026**, for **end-of-studies** students who are available for a **potential full-time contract** immediately after the internship.

We offer various roles across multiple teams: Backend, Frontend, Distributed Systems, Infrastructure, Security, Mobile, Libraries and Open-Source Technologies.

All of our interns are given ample responsibility to enable their growth and impact.
You will gain an authentic experience that emulates that of a full-time Datadog employee!
